Key Skills

- Android
- Kotlin
- JAVA
- SQLite
- JIRA
- REST & SOAP API
- GITHub, GIT Lab
- UNIX
- Android Auto
- Clean Architecture
- JSON, XML
- Agile Methodology
- UML
- MySQL
- Object Oriented Programming
- Android SDK
- Jetpack Library
- Jetpack Compose
- HTML
- MVVM
- Unit Testing
- MVP

Resume Highlights

- **9 years of experience** as **Android Developer** in automotive HMI application and mobile application development
- Proficient in leveraging **Jetpack library, Jetpack Compose, and Clean architecture** for app development.
- Successfully contributed to the development of HMI applications for **Tuner and** mobile applications in **entertainment, business, and health domains.**
- Developed innovative features for proprietary Android applications deployed on **phones, tablets, and Android Auto.**
- Demonstrated strong experience in **designing, developing, and implementing software applications** with a focus on robust architecture.
- Experience in Android app development with Android Studio using **Java** and **Kotlin**
- Proven track record in writing unit test cases using **Junit and Mockito,** ensuring high-quality software.
- Very good understanding of **Android Back -end** and **UI Guidelines**
- Used different architecture pattern **MVVM, MVP** for app development.
- Extensive experience in **integrating third-party SDKs (Conrad)** and popular libraries **(Volley, Retrofit, Room Persistence Library).**
- **I**mplemented **SQLite, Google Maps, and seamlessly integrated APIs from Google, Facebook, and Twitter.**
- Experience in **Object Oriented Architecture, and Design**
- Thorough understanding of Agile Software Development methodologies, actively participating in all Agile ceremonies.
- Managed tasks within Agile frameworks, adept at clearing sprinted tasks, and controlled Jira workflows effectively.
- Strong understanding of **multi-threading, concurrency** and **memory management**
- Worked on mobile application in which **payment gateway** was used
- Good Knowledge of **OOPs concepts, Collection**, Arrays and String in JAVA.
- Have hands-on experience in **complete project life cycle** with domain knowledge in Mobile
- Handling various technical aspects like coding of modules using given **design specification, debugging** and **fixing the defects** as well as analyzing its root cause
- Experience of development of **Park Assist** , **Radio** app for **automobile** related clients
- Proficient in Unified Modeling Tool (UML) for designing use cases, class diagrams, and sequence diagrams.
- Worked on business application which include **encryption**
- Manage the software life cycle from the level of **design** to **implementation**, **testing**
- Ability to grasp and **master new technologies, excellent analytical and problem-solving skills**
- Able to take initiative, work independently and also **a good team player**

Skills & Technology

Language: **JAVA, Kotlin, C, C++, HTML, XML**
Database: SQLite, MYSQL
Tools: Android Studio, Eclipse, GitHub, GitLab, JIRA, UML, Gradle, Maven, Junit
Certification: PG-Diploma in Wireless and Mobile Computing(C-DAC) **Operating System**: **-** Windows, Linux, UNIX **MS Suit**: Excel, Power point, Word etc.

PROFESSIONAL EXPERIENCE

1. **Company Name: KPIT, Pune**: From July 2023 to till date

Client: Nissan

- Worked with architect to design application
- Used Jetpack Compose, Room for UI and DB purpose.
- Communicated with client for project understanding and requirement clarification
- Developed aosp Radio application having AM FM band to play different stations

Client: Panasonic

- Collaborated with lead to design and develop customized products based on customer needs.
- Implemented advanced features using Jetpack Compose, ensuring a modern and intuitive user interface.
- Conducted requirement gathering and maintained effective communication with the client.
- Developed HMI application "Park Assist" for Infotainment, aiding drivers in car parking.
- Implemented video rendering feature and utilized tools such as Git and KPIT Agile Planning (Jira).

2. **Company Name: TATA Consultancy Services, Pune**: From May 2016 to July 2023

Client: Nissan

- To manage project work and provide technical guidance to team for the design, development and delivery of product.
- Interact with customer/users on operational aspects of project related solution/service delivery, issue etc.
- Work with the Manager of Mobile Development to provide estimates and status updates
- Work closely with Development, QA, Project Management and Product teams to ensure timely and cost-effective delivery of final products,
- Act as technical lead on projects, assist with defining the solution, and working with a team of developers
- Performing software development for Android based Car Infotainment systems using Java and Kotlin, Android application Framework Architecture and APIs
- Good experience with CI/CD tools such as git, GitHub, Jira
- Work with our API developers to provide data to the apps via RESTful APIs w/JSON

Client: Mitsubishi Motors

- Work with lead mobile developer to establish common development tools, and frameworks/libraries that the group will use
- Communicate to the Digital Manager and Project Managers, providing development time estimates and progress updates, with efficiency and accuracy
- Providing architectural direction on behalf of the architecture
- Performing peer code reviews for immediate and related teams
- Sharing your technical solutions and product ideas with the Pain Scale team through design review, pair programming, code review and tech talk
- Coordinating with Architecture group on new designs and foundational / infrastructural application changes
- Android development for Car Infotainment system using Java, also worked on creating library

Client: Pfizer

- Analyzing user stories and participating in sprint planning, scrums, demos and retrospectives
- Communicating ideas across teams effectively and quickly
- Providing estimates for new initiatives
- Developed health application for Phizer Hemophilia
- Worked on bug fixing and troubleshooting the production issues

3. **Company Name: JKT Learning Solutions, Pune**: From June 2015 to May 2016

- Gathered client requirement and involved in design and development of android app
- Used SVN for version control of the source code/module
- Performed unit testing and integration testing

- Used Material Design using CardView, RecyclerView and classic principle of good design
- Integrated REST Web services, JSON in app
- Used SQLite, worked on encryption using SMS4, AES256
- Created Release notes and Changes request for UAT and Production deployment

4. Company Name: Purplechai Technologies, Pune: From Feb 2014 to June 2015

- Integrated Google, Facebook for login
- Integrated Payment Gateway, worked on Rest API, JSON, HTML
- Designed SQLite database schema for implementing persistent data storage
- Designed custom animation for transition between application activities
- Utilized navigation drawer to easily switch between application activities and fragment
- Worked on Eclipse for app development and debugging the application using Logcat, DDMS
- Utilized git version control tool as source control management system
- Worked on implementing multi-language support
- Supported multiple screen resolutions to provide proper resizing across multiple devices

ACADEMIC DETAILS

Examination	Institution	Board/University	Year of Passing	% Marks
PG Diploma	Sunbeam Institute	C-DAC	2013	67%
BE (E & TC)	SVPM COE, Malegaon	Pune University	2012	61%
HSC	Shardabai Pawar Mahila Vidyalaya, Baramati	Maharashtra	2008	74%
SSC	Palasnath Vidyalaya, Indapaur	Maharashtra	2006	75%

STRENGTHS

- Team leading Management
- Problem Solving Skill
- Positive attitude
- Decision making
