

Dilip Nigam

Senior Consultant | **Cloud & DevOps Engineer**

+91-9650032854 | dilipnigam007@gmail.com | Pune, MH

PROFILE SUMMARY

- ITIL V3 Foundation, Cloud and RHCE Certified Professional offering **12 years** of experience in **IT industry**.
- **4** years of experience in AWS Cloud, IaC tool Terraform and DevOps tools like Git, GitHub, Jenkins, Docker Container, Kubernetes, Shell Scripting and Linux/Unix to create CI CD Pipeline.
- Following best practices on Software Development Life Cycle and use cases of the Automation tools using Jenkins, GitHub and integration with Docker, JFrog, Tomcat, Kubernetes and Maven.
- Experience in Writing Jenkins File to build, test and deploy app through CICD pipeline and Docker File to build Docker images.
- Experience in Writing Kubernetes Deployment manifest files to include application deployment configurations.
- Expertise in implementation of best practices in Linux servers and Process Management; Exhibited excellent workmanship in day-to-day operations such as ticket resolution, technical support, incident management and change request management.
- Proficient in IBM Maximo, Impact, Service Now, JIRA and Remedy and Bugzilla (IBM Tool) Ticketing Tools.
- Capable of providing enhanced Server Capacity Planning & Forecast Reports.
- Exhibited excellence in providing technical trainings on Linux and Open-Source Technologies with key focus on implementation, designing & troubleshooting of data centres.
- Track record of analysing information system needs, evaluating end-user requirements, custom designing solutions & troubleshooting for complex information systems management.
- Possess in-depth knowledge of UNIX, VMware Servers, and Virtualization, Lean and Six Sigma Methodologies.
- Wealth of expertise entails in resolving critical issues with extensive experience in monitoring, tuning, and performing trend analysis of the System/Network performance.

CERTIFICATES, BADGES, DEVOPS TOOLS

DevOps Tools and Cloud-

- Git, GitHub
- Maven
- Jenkins
- Jfrog
- Docker
- Kubernetes
- Iac Tool Terraform and AWS Cloud

Certificates-

- Red Hat Certified Engineer: Certificate Number: 130-016-140
- Azure fundamentals Certificate
- ITIL v3 Certified
- Data Science IBM
- BMC TrueSight Certified

CAREER TIMELINE

- 1-IBM India Ltd. Hyderabad - 2011-2014
- 2- Tech Mahindra, Pune - 2014-2015
- 3-IBM India Ltd., Bengaluru - 2015-2022
- 4-Atos India Pvt Limited, Pune – from April 2022 to Present

WORK EXPERIENCE

Senior Consultant – AWS DevOps

ATOS

March'22 to Present

- Writing Jenkins Shared Libraries in Groovy and integrating Shared Libraries in the Jenkins Pipeline for Application Deployments.
- Integrated Jenkins Pipeline with Apache Maven, Node, and Sonar to automate Continuous Integrations for Build.
- Analysed the source code layout and design CI/CD architecture for Build and Deployments.
- Manage Jenkins Control Flow for Docker.
- Integrating Configuration Management using scripting and Ansible.
- Writing Kubernetes Deployment manifest files to include application deployment configurations
- Writing Jenkins Pipeline code using Groovy to integrate and automate the build & deployment tools for application deployments.
- Writing Helm Umbrella Charts and environment specific charts for Dev, QA, and Prod environments.
- Setting up Name spaces from scratch for new application on-boarding.
- Writing manifest file definitions for config maps, secrets and mounting these resources as volume mount and environment variables for application
- Configuring Docker Registries for new applications to store container images and integrating with Jenkins pipelines for automation.
- Managing source code version tagging and preparing release notes accordingly while handover to the service delivery teams.
- Responsible in monitoring the application health status and fixing the run time issues.
- Analysing container application logs, identifying the issues, and coordinating with the concern team to fix it.
- Scaling the containers applications as per the demand on Open Shift container platform
- Analysing Pipeline code for project specific build and deployments to the Open Shift name spaces for to fix any Production issues.
- Responsible in preparing the build and deploying to non-prod environments and release notes to service delivery team for production deployments and supporting the production issues.
- Configuring application health checks Liveness probe and Readiness probe parameters to monitor containers health.
- Solving complex business problems and delivering the applications releases timely manner and streamline the process accordingly.

DevOps Engineer

IBM

2015 to March'22

- Responsible in troubleshooting build issues and coordinating with the Dev teams to fix the issues and defining the automated process for deployments.
- Performing rolling updates when new source code version is released.
- Experience in setting up project baselines, branching strategies, merging and taking regular backups of the source code.
- Experience in writing playbooks to automate infrastructure creation, configuration and operation changes with help of modules in playbooks.
- Expertise in writing playbooks and converting into Roles for Scalability and Reusability in Ansible.
- Proficient in AWS Cloud platform and its features which includes EC2, VPC, EBS, AMI, SNS, RDS, CloudWatch, Cloud Trail, CloudFormation, Autoscaling, IAM, S3, and Route53
- Implemented Amazon EC2 setting up instances and security groups with Cloud Formation
- Created alarms and trigger points in CloudWatch based on thresholds and monitored the server's performance, CPU Utilization, disk usage.
- Create and configure S3 bucket with restricted policies.
- Set-up databases in AWS using RDS, storage using S3 bucket.

- Create AMIs of instances and snapshots from volumes.
- Proficient in implementing and adapting to Release/Change Management Process.
- Exposure to administration of servers such as Tomcat, Apache.
- Experience in Build, Package and Deploy to all the environments by targeting to Tomcat, Apache.
- Deploying, configuring, managing, Master and Agent machines using Ansible.
- Configuring and maintaining Ansible Master Server, creating Playbooks and managing Nodes.
- Handling when there is Flood of alerts and joining the Bridge calls and making sure the issues get resolved
- Responding to alerts in timely fashion as per the pre-defined priority levels and SLAs.
- Work on ticketing system wherein we get requests for Change, Incident, and Standard Service requests.
- Worked with Development Teams and Testing Team to troubleshoot failures, if any.
- Working with capacity management tools like BMC Performance Assurance (BPA), and BMC Capacity Optimization (
- Analysis of reports generated from the OS Metrics using BCO views, BMC Perceiver and BMC Visualizer.
- Forecasting the impact of changing business environment on IT service delivery.
- Real time/Historical infrastructure performance diagnostics and production support.
- Coordination / leadership of performance SME virtual teams – SA, DB, Middleware, Network, Storage, etc.
- Infrastructure performance reporting structure design and steering.
- Approving IT Infrastructure Capacity Demands for upcoming and ongoing projects for all IT Infrastructure.

Capacity Management & Automation

Tech Mahindra Pune

Jun'14-Nov'15

- Worked in BCO Primarily
- Used Shell Scripting for Automation.

Capacity Management

IBM India Ltd. Hyderabad

Apr'11- Jun'14

- Leading a team to manage the end-to-end server administration on Linux Platform and ensuring stable operations, availability, reliability, and service capability.
- Spearheading entire gamut of Linux administration, cloud administration, networking and technical support operations inclusive of application installation, configuration, testing and many more.
- Acting as an Escalation Gate, addressing client queries/issues on priority through tickets or calls which resulted in achieving customer satisfaction matrices.
- Applying software patches as required, maintaining up-to-date operating system environments and patching Linux Servers as & when required.

EDUCATION

B.E. in "Electronics & Communications" from "Vindhya Institute of Technology & Science Satna" affiliated to RGPV University Bhopal, with an aggregate of 67% in 2009.
