

PRASHANT CHOUDHARI

Senior Devops Engineer

+91-9823795421 @ Prashant.choudhari5538@gmail.com www.linkedin.com/in/prashant-choudhari-103baa17a

SUMMARY

Experienced in thriving within dynamic environments, I specialize in migrating legacy systems, including transitioning APM tools from AppDynamics to New Relic, and supporting Docker-based applications. With a strong focus on health monitoring, performance tracking, and release management, I've contributed to improved operational efficiency, streamlined processes, and optimized delivery. I collaborate closely with cross-functional teams to develop and implement best practices, ensuring seamless integration and continuous improvement. My proactive approach to issue resolution and dedication to driving operational excellence supports business goals and enhances overall system performance

EXPERIENCE

Senior Devops Engineer

Hexaware Technologies

2024 - Present Pune, India

Company Description

- Design, implement, and maintain Continuous Integration (CI) and Continuous Delivery (CD) pipelines using **Azure Pipelines**.
- Configure and optimize **YAML** or **Classic Pipelines** for building, testing, and deploying applications.
- Utilize **Azure Resource Manager (ARM) templates**, **Terraform**, and **Azure CLI** for infrastructure provisioning.
- Manage repositories using **Git** within Azure Repos. and Set up branching strategies (e.g., GitFlow) and manage pull requests and code reviews.
- Involved in the integration of DAST tools (e.g., Qualys) and SAST tools (e.g., Checkmarx) into the CI pipeline.
- Integrated SCA scanning tools like Jfrog X-RAY within the CI pipeline for enhanced security and performance testing.
- Managed self-hosted agents on Azure DevOps to streamline CI/CD operations, improving automation and overall development lifecycle.
- Provisioned VMs and Web Apps for application teams using Terraform, while also managing and maintaining existing resources on Azure through Terraform automation.
- Documented all meeting outcomes and key discussions with the application team on the Confluence page to ensure clear communication and knowledge sharing.

Associate Software Engineer

CDK Global

01/2022 - 07/2024 Pune

A global leader in software and technology solutions for the automotive industry

- Collaborated with the Application Team as a DevOps/SRE to manage and oversee all DevOps-related tasks.
- Played a key role in the migration project, transitioning from Bamboo to GitHub Actions and migrating APM tools from AppDynamics to New Relic.
- Part of the migration of both legacy systems and microservices from AppDynamics to New Relic for improved monitoring and performance insights.
- Configured and set up critical Health Rules and Alerts for both legacy systems and microservices to ensure system reliability.
- Monitored all critical services and created detailed dashboards in New Relic to track performance and system health.
- Developed and maintained CI/CD pipelines to streamline development and deployment processes for application teams.
- Managed the Release Management process, including the creation of KPIs, Rollback plans, and other essential duties to ensure smooth releases.
- Utilized various AWS services including EC2 for scalable compute, S3 for storage solutions, VPC for secure networking, and Lambda for serverless computing. Managed RDS for relational databases, configured Load Balancers for traffic distribution, and implemented Auto Scaling to ensure high availability. Additionally, handled IAM for secure access management across resources.

Production Support Engineer

Cybage Software Pvt Ltd

01/2019 - 12/2021 Pune

A leading global technology consulting organization

- Contributed to the T&H (Travel & Hospitality) domain implementation project as a Jr. Engineer focusing on DevOps and Linux operations.
- Worked closely with the application team to address various tasks involving AWS, Docker, and Linux-based operations.
- Gained hands-on experience with core AWS services such as EC2, S3, VPC, and IAM, providing support to the application team in dockerizing Java-based applications.
- Regularly reviewed and validated branching policies for the application teams, helping them implement best practices for effective branching strategies.
- Conducted routine monitoring of Linux servers, tracking CPU usage, memory usage, disk space, and network performance to ensure optimal system performance.
- Utilized tools like Kibana for log analysis to identify and troubleshoot issues across various services.

SKILLS

AWS	Azure Devops	Docker	GitHub	Kubernetes	Linux	New Relic	Nginx	Python	Terraform
GitHub Actions	Shell Scripting								

EDUCATION

Bachelor's degree in Information Technology

[Pune University](#)

 08/2012 - 05/2017  Pune

TRAINING / COURSES

[CDAC course](#)~~from~~[CDAC ACTS - 2018](#)

A specialized course focused on advanced computing technologies that prepare students for roles in software development and IT

[Azure Administrator Associate \(AZ - 104\) Microsoft Certified — 2025](#)

Microsoft Certified Azure Administrator Associate (AZ-104) with expertise in managing Azure resources and cloud infrastructure.
