

RESUME

Name: Sandeep Uttam Patil

Contact No: 9623690193

Email: sandeep.patil1991@gmail.com

- ❖ **Objective:** To be a part of an organization that gives me the challenges and opportunities to learn and update my knowledge & skills.

Educational QUALIFICATION

Degree	Board / University	Year of Passing	CGPA	Class Obtained and Grade
BE (Computer)	North Maharashtra University. Jalgaon.	2016	7.09 /10	B-Grade

GLOBAL CERTIFICATIONS & EXTRA-CURRICULAR ACTIVITIES

- **MICROSOFT (ID - S9hL-uGhQ)**
- **GCP Associate Cloud engineer global certified**
- **AWS Solution Architecture associate global certified**
- RHCA Training in Radical institute kharadi Pune,

Experience Summary:

- **9+ Years** of IT experience in **Operations and DevOps** (Including as DevOps and Architect).
- Experience in cloud computing with **AWS using the EC2-instance, Elastic Beanstalk, ELB, S3-bucket, RDS, Dynamo DB, R53, VPC** etc.
- Experienced in **DevOps** action on automation in **CI-CD pipelining (Down-stream processes)** with starting to **Maven** throughout the **Jenkins** with their different plugin managements, part (with **GIT, Maven, Jenkins, Code coverage, Code analysis, Junit-Test**) pro-actively being the in the Devops culture by managing the system security (with **LDAP**) in **Jenkins** to secure the application.
- Over 7+ years of **devops experience** in IT industry
- Around 6+ years of experience in **AWS Cloud** environments
- Strong experience in **CI** (Continuous Integration) and **CD** (Continuous deployment) using **Jenkins**
- Experience with Code Quality tools such as **SonarQube**.
- Skilled experience in **Jenkins Admin level concepts** (in System configuration, plugin- management, Node/Slave configuration/connection, Job configuration, Job-creation/Set-up. Even with CLI and Jenkins with docker while setting up the multiple jobs with the help of shell-scripts. Also in **Migrating the Jenkins backup/restoring** from one server to another server.
- Experience in designing, implementing and operating **multi- site, high- availability, data center infrastructures** and associated virtualization implementations in an Enterprise environment.
- Experience in **Docker orchestration** with related Tool as **Docker swarn and Kubernetes**
- Experience in creating **custom based Docker images** as per the organizational need.
- Experience working in and maintaining a 24x7 production environment.
- Experience includes leading teams, collaborating with multiple departments in IT, handling escalations and reporting to Executive Management.
- Understanding of Continuous Integration (**CI**) and Continuous Development (**CD**) practices.

Technical Skills:

Configuration Management: Ansible.

Continuous Integration: Jenkins. Github action

Version Control: Git, Github,

Build Tools: MAVEN, ANT

Cloud Platforms: AWS (Amazon Web Services) Microsoft Azure .Google Cloud Platform

Amazon Web Services (AWS) : EC2, S3, Cloud Formation, VPC, Route53, Auto Scaling, ELB, Glacier, EKS, Cloud front, Cloud watch,Cloud Trail, IAM.

Containerization: Docker, Docker hub cloud SDK

Orchestrator: Kubernetes, GKE

Artifact Repository: Nexus, JFrog

Code Quality Tool: SonarQube, Checkmarx

Monitoring Tool: Nagios Prometheus, Grafana, ELK

Issue Tracking: BMC Remedy, Service NOW, Bugzilla. Jira,

Operating Systems: Linux (Red Hat 5/6/7, SUSE), Ubuntu, Cent OS, Windows Variants and Unix.

Programming Languages and Scripts: Bash script, Python

Web Technologies: Web logic, web Sphere, Load Balancers.

Web Services : Json, Rest, XML.

Project management Tool : Jira, Confluences.

Project Details:

Company Name: Wipro Technologies Pune

Client: Lloyds banking group / charles schwab

Position: GCP Platform SRE engineer / senior Devops engineer

Period: March 2023 to Till Date

Responsibilities:

- **Created the automated build and deployment process** for application, re-engineering setup for better user experience, and leading up to building a continuous integration system for all our products.
- working on **Build and deployment by using GitHub Actions**
- worked on terraform files and creating the resources .
- creating new Jenkins pipelines and **docker and Kubernetes task .**
- working on **CICD pipelines Jenkins, GitHub actions .**
- Implemented rapid-provisioning and life-cycle management for Ubuntu Linux using **Amazon EC2, Ansible**, and custom **Bash** scripts.
- Worked on Managing the Private Cloud Environment using **Ansible**.
- Developed automation framework for Application Deployments to the cloud environments
- Manage source control repository in subversion – controlling and monitoring check-ins& create tags for

- Helped development and Developer teams in using GIT
- Automate the build Process using Jenkins jobs. Date wise daily keeping track all the Script
- Managed and optimize the Continuous Delivery tools like **Jenkins, Github Actions**
- Install, Configure, Administer **Jenkins and GitHub Actions** Continuous Integration Tool
- Developed and implemented Software Release Management strategies for various applications according to the agile process.
- Developed build and deployment scripts using **MAVEN** as build tool in **Jenkins** to move from one environment to other environments.
- Worked on Managed Monitoring Tool **Nagios** to monitor the health of system infrastructure.
- hands on experiences on GCP cloud console platform infrastructure specific .
- worked on **virtual network , firewalls and Load balancers , interconnects ,open VPN, DNS, Networking**
- worked on experiences **Google Kubernetes engines migrations**
- **GCE hands on experiences of terraform deployments for GCP resources .**
- **worked on CI/CD pipelines , GCP,GKE,**
- worked on **change request PR approval and merging the pr . spanner ,LDAP**
- **experiences on Big Query , Big Table , data Prod**
- **hands on experiences in Cloud SQL, DATA proc**
- worked on **Jenkins pipelines and troubleshooting errors** again rerun the pipelines
- **worked on shared VPC , Dataflow.**
- Implemented **AWS** solutions using **EC2, S3, RDS, EBS, Elastic Load Balancer**, Auto scaling groups,
- Optimized volumes and EC2 instances
- Branching, Tagging, Release Activities on Version Control Tools: **GIT**.

Project Details:

Company Name: Mindcraft software pvt..Ltd

Client: IDFC

Position: Senior consultant

Period: April 2021 to March 2023

Responsibilities:

- Develop Custom Scripts to monitor repositories, Server storage.
- Member of the Technical Design team, Build and Release Module for Development of new products.
- Performed and deployed Builds for various Environments like QA, Integration, UAT, OAT and Productions Environments
- Automated deployment of builds to different environments using Jenkins.
- Installed **Ansible** Registry for local upload and download of Dockers images.
- Involved in all projects that move to production and work closely with the Data Center, Development, Quality Assurance and Management teams to ensure cross communication and confirmed approval of all production changes
- Developed automated shell scripts for automation of the build and release process.

Project Details:

Company Name: Artech infosystem Pvt. Ltd

Client: KPMG Pune

Position: Devops Engineer

Period: 2019 to March 2021

Responsibilities:

- Automated deployment of builds to different environments using Jenkins.
- creating branches, comparing & merging using Subversion.
- creating war files using ANT and MAVEN.

- scheduling and deploying the builds to QA and Production environment.
- Helped development and QA teams in using GIT.
- Maintain track of different releases that are being carried over in different environment.
- Automate the build Process using Jenkins jobs. Date wise daily keeping track all the Script.
- Monitor and manage CI, nightly and release builds using Maven and Jenkins.
- Integrate Unit Testing, Code Coverage and Deployment tools with Jenkins and Ant.
- Used Ansible for application automatic deployment and provisioning to different environments.
- Installing and configuring application servers for deploying artifacts as per project requirements.
- Verify Deployments logs to check for successful deployments.
- Bug tracking and analyzing test results and prepared Release notes.
- Verify Deployments logs to check for successful deployments.
- Working on **jira project management tool** for workflow creation and configuration
- Working on **confluences on boarding configuration** and roles.

Project Details:

Company Name: Inknowtech Pvt. Ltd

Client: Mphasis HP Pune

Position: cloud engineer

Period: March 2018 to March 2019

Tools Used: service now, Remedy

Responsibilities:

- Worked on Amazon Web Service (EC2 Elastic compute cloud).
- Server's, Domain's and Database's migration on Amazon Web Services.
- Setup/Managing Linux Servers on Amazon (EC2, EBS, ELB, SSL, Security Groups, RDS, and IAM).
- Setup/Managing VPC, Subnets; make the connection between different zones; blocking suspicious ip/subnet via ACL.
- Create/Managing buckets on S3 and store DB and logs backup, upload images for CDN serve.
- Setup/Managing Databases on Amazon RDS. Monitoring servers through Amazon Cloud Watch, SNS.
- Creating/Managing DNS records on Amazon Route 53 and Freedom panel
- Creating/Managing AMI/Snapshots/Volumes, Upgrade/downgrade AWS resources (CPU, Memory, EBS)
- Monitor Production Server Health of different parameters (CPU Load, Physical Memory, Swap Memory).
- Working on jira project management tool configuration and workflow
- Working on confluences onboard the user and provide the access.

Project Details:

Company Name: Accel Frontline Pvt. Ltd**Client:** Tech Mahindra Business Services**Position:** Customer service engineer **Period:**July 2016 to March 2018 **Responsibilities:**

- Monitor Production Server Health of different parameters (CPU Load, Physical Memory, Swap Memory.
 - Data backups of File server (NTBACKUP), and Backup Taps management
 - Supporting 2500 + users physically or remotely. (I used to VNC, Amy Admin, Team viewer, RDP tools, for remote purpose)
 - Various Client application installation and troubleshooting . (Android, IOS Devices)
 - Laptop Preparation & configuration as per WNS Standard polices.
 - Providing support to user for various Windows based application.
 - Handling McAfee and Anti-Virus, Safe Boot, Bit-locker
 - Updating of Asset Inventory Asset Management .
-

I declare that all the information stated above is true and in best of my belief.
