OBJECTIVE:

4+ years of experience in Automation, Installation, configuration and troubleshooting of Linux, windows platform and optimizing deployments in AWS based environment, leveraging configuration management, CI/CD, and DevOps processes.

EDUCATION:

Dr. Babasaheb Ambedkar Technological University Lonere in 2017 Major: B. Tech in Electronics and Telecommunication Engineering

FUNCTIONAL EXPERTISE:

- Operating System: Windows, Linux, Mac
- Networking: DNS, DHCP, HTTP/S, SMTP, FTP.
- Virtualization – VMware
- Cloud: AWS, Azure devops
- Version control: Git
- Language: Python, Bash Shell script.
- Container: Helm, Kubernetes, Docker
- Configuration management frameworks: Ansible, Terraform
- CI/CD Tools: Jenkins, ArgoCD
- Monitoring tools: Prometheus, ELK, Cloud Watch
- Methodology: Agile
- Database: Microsoft SQL server 2019

EXPERIENCE SUMMARY:

Company Name: Crest Data Systems
Job Title: Senior DevOps Engineer
Joining Date: 1-Oct-2021 to till date.

FENS

- Used Agile methodology for project management and Confluence Used for documentation
- Implemented CI/CD using multiple Jenkins Master and slaves and configured with pipeline using GIT
- Experienced with configuring minikube to deploy applications locally in different environments (Like Dev, QA, Test, Stg)
- Installation and configuration of ArgoCD and managing application through that
- Working on Migrating from self-managed Kubernetes to Amazon EKS by using Terraform
- Experienced with Custom metrics monitoring through Prometheus
- Experienced with cluster monitoring through ELK
- Working with Helm to deploy and manage applications using charts

LinkedIn Guardrails and CF

- Deployed and Designed Azure DevOps pipelines to manage resources and maintain the infrastructure
- Experienced with Azure cloud services, Azure Virtual machines, Logic app, ARM templates
- Worked on CRT tool to deploy the application till production

Company Name: Ensono
Job Title: System Engineer
Joining Date: 3-Nov-2020 to 30-Sep-2021

- Used JIRA as a Change Management/ Work Management/ SCRUM Agile Tool
- Experienced in Branching, Merging, Tagging, and maintaining the version across the environments using SCM tools like GIT on Linux platforms.
- Experienced in strategy and practical implementation of AWS Cloud-Specific technologies which include IAM, EC2, EBS, S3, VPC, ELB, CloudWatch.
- Experience working on Multiple AWS instances, set the security groups, Elastic Load Balancer and AMIs, Auto scaling to design cost effective.
- Worked on creation of custom Docker container images, tagging, and pushing the images using Docker file.
- Have a knowledge about the CI/CD pipeline with different tools like Jenkins and docker.

- Experience in Kubernetes:
    - Kubernetes components: Etcd, API server Management, Controller manager, Pod, Services, Deployments, Namespaces.
    - Kubernetes scheduler: Labels and selectors, Taints and tolerations, Node selectors, Node Affinity, Daemon sets.
    - Container registry - Docker.io
    - Logging and Monitoring
    - Configmaps, secrets
    - Cluster Maintenance
    - Security: Authentication (Certificate), Authorization (Rbac, roles, cluster roles, bindings), Kube config, Network policy.
    - Persistent Storage for containers: storage class, static and dynamic allocation.

Company Name: Quick Heal Technologies Ltd.
Job Title: Associate Support Engineer - Seqrite Endpoint Security Cloud.
Joining Date: 03 - Sept - 2018 to 30 -Oct -2020

Serves as a Firm's Front-end Technical Engineer to troubleshoot and resolve customers issues.

- Configured Seqrite product server and client as per customer requirement. Managing all client from seqrite console through policy.
- Excellent Communication skills & experience on working with global customer.
- Ability to monitor network, servers, and file transfers to meet commitments.
- Ability to monitor multiple applications and data transfer protocols to meet customer needs.

Linux, Bash Scripting, Python:

- Use help commands for fast and efficient reference (man, whatis, -help)
- Everyday use of filters and text processing commands (cut, sort, grep, awk, uniq, wc)
- Keep the system secure by monitoring user activity through secure log messages and tools such as (who,last, etc.)
- System management using commands (top, df, dmesg, iostat 1, netstat)
- Setup aliases for ease of management
- Manage OS network (ping, ifconfig, netstat, tcpdump, networking config files).
- Developed bash Scripts for day-to-day tasks like providing and revoking Temp root Access to users, Providing Password less SSH.
- Developed a Bash Script for Checking server status continuously.

AWARDS/RECOGNITIONS:

- Employee of the Month (2018-2019)
- Runner Up award in 25th anniversary of quick heal in singing.
