CARRIER OBJECTIVE

To work in a competitive and challenging environment where I can use my experience and skills for the growth of organization, which encourages in updating my knowledge, innovative new technological developments, maintaining positive attitude and establish an enjoyable career.

PROFILE SUMMARY

A professional with 9.8+ years of experience in handling technology/non-technology projects encompassing planning, proposal, implementation and maintenance of Linux infrastructure Servers with Devops tools

Resourceful in mapping client requirements; functioning as the single point of contact in providing guidance and support on all aspects of technical servicing and maintenance operations.

An effective team member with distinguished abilities in end-to-end technical project support management training & motivating colleagues to maintain deliverables as per the SLA.

PROJECT WORKED

- | | |
|----------------------------|---|
| 01. Company | HCLTech (Mar'24 – Till Present) |
| Project Description | Working in a project where I am part of automation team which handling Managing and Deploying UEM Application to End user Client. We are doing it through Automated process using various DevOps tools. Also, we are the responsible for managing the Devops Infra. |
| Tools Used | AWS, Jenkins, Ansible, Kubernetes, Terraform, EKS, Grafana, GitHub, VMware, |
| Responsibilities | <ul style="list-style-type: none">• Writing Code for the automation and enhance the existing code.• Working on Bug/Jira to remediate the automation failure.• Support as Prod on-call for any automation jobs Failure running by other Application/Infra teams.• Running and building the Jenkins Pipelines.• Managing the Client Infra and remediating the Vuln's.• Performing upgrading and patching for the Application version.• Enabling Monitoring for the Devops Infra.• Deploying the Infra using Terraform.• Creating/Modifying Ansible Playbooks.• Reviewing the PR's raised by peer team members.• Participated in Jenkins, Docker and K8 version upgrade. |
| Operating Systems | RedHat, Windows |
| 02. Company | Cognizant (Nov'23 – Mar'24) |
| Project Description | Worked on a project where we will be performing monthly patching wrt to Redhat monthly patch release for more than 2000 RHEL & Centos Servers. Supporting Client |

Tools Used
Responsibilities

Linux Infra and providing daily support to BAU activity and to middleware application team. Managing major upgrade of servers from RHEL 7 to 8.

AWS, Venafi, GitHub, Jenkins, Ansible, CCP, VMware

- Patching of RHEL & CentOS servers hosted on AWS, VMware & CCP private cloud.
- Troubleshooting Issue related during and after Patching
- Upgrading RHEL 7 server to RHEL 8 using Ansible
- Upgrading Centos 7 server to Rocky 8 using Ansible
- Fixing all OS and configuration related issues raised by User or App team
- Working on remediating OS vulnerabilities
- Maintaining code in Git Hub repo.
- Troubleshooting and checking middleware logs
- Implementing automation using Ansible and shell scripting and other DevOps tools.
- Managing AWS Infra and provided support to manage various AWS services.
- Creating & Managing Jenkins CI/CD Pipeline

Operating Systems

RHEL 7 & 8, CentOS 7, Rocky 8

03. Company Project Description

Capgemini (Oct'21 – Nov'23)

Worked for Insurance company which is having customer facing websites and infra. We are managing the infra on AWS and providing support for application hosted on Middleware. Also, I worked on providing the automation which can be implemented to reduce manual effort using DevOps tools

Tools Used
Responsibilities

AWS, Venafi, GitHub, Jenkins, Ansible, IBM MQ, CyberArk

- Launching amazon EC2 cloud instances manually or by using CFT template and configuring launched instances with respect to specific application and Regions.
- S3 bucket creation, Policies and IAM role-based policies.
- Configuring Auto scaling groups and EC2 Scheduler
- Supporting Elastic Container Service for running tasks and maintaining service API
- Deployment of Auto scaling servers using Jenkins pipeline
- Using Jenkins pipeline to make changes in Infra
- Maintaining code in Git Hub repo.
- Troubleshooting and checking middleware logs
- Patching of servers and vulnerabilities
- Implementing automation using Ansible and shell scripting and other DevOps tools.
- Managing infra of the clients as a Linux Admin and basics of Window troubleshooting
- Managing Certificate for website.
- FTE IBM MQ for file transfer

Operating Systems

RHEL 7 & 8, Windows OS

04. Company Project Description

TCS (Jan'19 - Sep'21)

Worked for project where we are managing more than 2,000 of servers of Different kind. We have to troubleshoot all the alerts and events. Also, we have to take care of admin activities like defining policies and rules based on roles, managing logs, load balancing configuration, auto scaling group, Route 53, VPN connection and backup of all data and EC2 instances.

Tools Used

AWS, Nagios, Cherwell, NetApp, Docker, Travis CLI, Cherwell, CyberArk

Responsibilities

- Launching amazon EC2 cloud instances using Amazon web services and Configuring launched instances with respect to specific application and regions.
- S3 bucket creation, Policies and IAM role-based policies.
- Migrating On premises VM's to Cloud
- Created monitors, alarms and notifications for EC2 hosts using Cloud Watch.
- Configured AWS Identity Access Management (IAM) Group and users for Improved login authentication.
- Created load balancers (ELB) and used Route53 with failover and latency Options for high availability and fault tolerance.
- Deploying Project through Docker and Travis CLI.
- Responsible for S3 bucket creation, Policies and IAM role-based policies

Operating Systems

REHL 7 & 8

05. Company Project Description

TCS (Feb'17- Dec'18)

Worked for project for SAP-Hybris client, where we have to upgrade more than 12,000 of E-commerce servers of Debian from wheezy to Jessie version. We have to manage and troubleshoot all the issues which we faced during up- gradation. We provided the 15 days of extended support for live environment VM's. We have used shell scripting and Ansible YAML Playbook.

Tools Used

Ansible, SPC on-Demand, Nagios, VMware Vcenter, Shell Script

Responsibilities

- Managing VM'S through VMware Vcenter.
- Upgrading VM's from Debian 7 to Debian 8.
- Snapshots and cloning of VM's.
- Troubleshooting all the issues faced during up-gradation.
- Ensuring for all the service like Hybris, Solar, Tomcat and Apache up and running fine on respective server.
- Directing & monitoring the performance and network related issues such as PS, Top, Netstat
- Managed services and daemons running on server.
- Did automation script for fetching details of servers which decrease the manual efforts
- Managing & Fixing Apache and URL's related issue.

Operating Systems

Debian 7 & 8

06. Company Project Description

TCS (Nov'15 - Jan'17)

Workload Automation- Worked for project where we need to schedule batch Jobs in different Linux servers using BMC Control- M tool. We used JCL Scripting for defining jobs. We also used to monitor the execution of jobs and documenting the runs, which would further enable us to check for defects. In this project, we were using IT-SME ticketing tool for service operation services.

Tools Used

BMC Control-M, ITSME

Responsibilities

- Worked with Control-M Scheduler in Unix/Linux environment.
- Batch Monitoring using BMC control M/Enterprise Manager.
- Scheduling and Executing Batch Jobs.
- Created and deployed Jobs using JCL Script in Different server.
- Using Reporting Facility tool for generating log reports.
- Created new jobs in control-M on Unix/Linux environment.
- Maintained Documentation for over 10,000 jobs created in Control-M.
- Used ITSME for all Scheduling request for production, incidents and Problem tickets

Operating Systems

- Administered Control-M training classes to Application/Development
 - Teams to be in scope of Batch Scheduling for use of Control-M scheduling using Microsoft Power Point
- Red Hat Linux 6 & 7

Key Skills

- ❖ **Functional:** Data management (server related), Strong verbal communication, Leadership skill, public speaking, Data presentation
- ❖ **Technical:** Linux Administrator, Cloud - AWS, Ansible, Docker, Jenkins, Shell scripting, YAML Scripting, Jason script, DevOps, Kubernetes, Helm, Cloud Admin, Terraform, PowerShell, Docker
- ❖ **Tools Used:** GitHub, Nagios, Cherwell, ITSME, Jira, BMC Remedy

Certification Details

- ❖ Certified in ITIL
- ❖ AWS Certified Solutions Architect – Associate

Academic Details

Qualification	Institution Studied	Year of Passing	Percentage/CGPA
B. E	Siddaganga Institute of Technology, Tumkur (Karnataka)	2015	8.04
10+2	DAV public School, Bihar Sharif	2010	67.6%
Matriculation	DAV Public School, Bihar Sharif	2008	76.33%

Personal Details

Father's Name: Dr. Manoj Kumar Srivastava
Mother's Name: Chanda Srivastava
Permanent Address: C/O Manoj Homeo Aushdhalaya, BiharSharif, Dist-Nalanda, Pin-803101 (Bihar)
Date Of Birth: 21st December 1992
Gender: Male
Language Known: English & Hindi
Marital Status: Married
Nationality/Religion: Indian / Hindu
Interest & Hobbies: Internet browsing, playing games

Place: Bangalore
Date: 26th Oct, 2025
