ABOUT ME

DevOps Engineer with 5+ years of experience designing, implementing, and managing complex cloud and on-premises infrastructures. Skilled in building and maintaining CI/CD pipelines, automating infrastructure, and orchestrating containers. Proficient in AWS, Docker, Kubernetes, Jenkins, GitHub and GitHub Action. Strong background in configuration management, system optimization, and delivering reliable, scalable solutions.

SKILLS

- Amazon Web Service(CLOUD)
- Docker
- Kubernetes (fundamentals)
- GitHub Action,
- Jenkins
- GIT, GITHUB
- JIRA
- CI/CD Pipeline
- Grafana
- Prometheus
- Shell Scripting, Bash

EXPERIENCE

DevOps Engineer

Motherson - Robis, Chennai

07/2024 - Present

- Designed and implemented end-to-end CI/CD pipelines for Fleet Application and FleetCore using GitHub Actions workflows.
- Created the deployment architecture, containerized applications using Docker, and pushed optimized images to AWS Elastic Container Registry (ECR).
- Automated deployment pipelines to pull images from ECR and deploy them to production servers.
- Managed and maintained GitHub repositories, branching strategy, pull requests, and workflow governance.
- Integrated Jira for task tracking, sprint management, and maintaining traceability between commits and requirements.
- Basic knowledge of Kubernetes for managing multiple containers, creating deployments, and working with YAML manifests.
- Performed troubleshooting and root-cause analysis for CI/CD failures, deployment issues, and environment-related problems.
- Collaborated with development teams to streamline deployment processes and improve release reliability.

DevOps Engineer

Yolksoft Global Technologies - Chennai

02/2020 - 05/2024

- Created and maintained fully automated CI/CD pipelines for code deployments.
- Automated build and deployment processes using Jenkins to reduce human error and improve delivery speed.
- Hands-on experience with Docker, including creating Docker images, running containers, tagging images, and pushing them to container registries (Docker Hub / AWS ECR).
- Set up infrastructure and application monitoring using Prometheus and Grafana.
- Utilized Amazon CloudWatch to monitor resources such as EC2, CPU/Memory usage, and EBS volumes, configure alarms for notifications or automated actions, and analyze logs for better system operations.

EDUCATION

B.E CIVIL ENGINEERING - 2017

HINDUSTAN COLLEGE OF
ENGINEERING, Coimbatore.

HSC - 2013

AYYANAR MATRIC.HR.SEC SCHOOL

SSLC - 2011

AYYANAR MATRIC.HR.SEC SCHOOL
