

NEERAJ KUMAR GUPTA
Mobile: +91-7259227501

nkg2889@gmail.com

Objective:

To grow with the organization utilizing my technical expertise and skill of quick adoption to new rapidly growing IT environment and technologies.

Job Profile and Accomplishments

- 10+ Years Experienced DevOps Architect with hands-on experience with Kubernetes, Docker, ansible, terraform, Openshift, GitHub Actions, Jenkins CI/CD pipelines, AWS and GCP cloud and solutions, Devops Best Practices, monitoring and performance reliability operations with the strong skill set to identify possible problem areas and prioritize different issues which arise during the software development life cycle.
- Designed and build Kubernetes clusters, SRE activities for in-house platforms, CI/CD pipelines using HCL Launch and Accelerate (DevOps products by HCL software)
- Designed and developed Automated solutions and lot many POCs and lead them to successful implementations with best Practices applied.
- Leading Devops initiatives for PaaS from front and mentoring Team members.
- Delivering trainings and tech talks to teams.
- Troubleshooting and Monitoring issues with capable monitoring system implemented.
- Designed and Implemented Devops solutions for all in-house products of HCL software.

Summary of Skills:

- **DevOps Tools (currently using)** : HCL Accelerate, HCL Launch, urbanocode Deploy(UCD), Jenkins CI/CD, Github Actions, Kubernetes, Istio service mesh, AppMesh, Helm charts, Azure Devops, Argo CD, Sonarqube, Nexus Artifactory, Jfrog, Selenium and Jmeter, OWASP, Openshift, terraform, ansible, ELK, AWS, GCP and IBM cloud, EKS, GKE, Rancher, Prometheus, NewRelic, Grafana, Cloudwatch
- **Cloud** : AWS, GCP, IBM cloud
- **Virtualization /containerization** : Docker, Kubernetes, Openshift, Rancher
- **Configuration mgmt** : Chef, Ansible
- **Infra-as-code** : Terraform and Cloud-Formation
- **CI/CD** : Jenkins, Azure Devops, GitHub Actions, Argo CD
- **Monitoring** : Prometheus, Grafana, NewRelic
- **App server/web server** : NGINX, HAProxy
- **Logging** : ElasticSearch, LOGstash, Kibana(ELK), FluentD
- **Scripting** : Python, Shell, Bash
- **Big data and events mgmt** : Hadoop, Kafka and Nifi
- **Mesh & Traceability** : OpenTrace, Istio, AppMesh, Kong, Glue

Educational Qualifications:

Qualification	University/Board	College / School	Year Of Passing	Percentage
B. Tech(IT)	RTU	Arya College Of Engg. & IT Jaipur	2011	75.13%
Std 12 th	RBSE	Govt Sr. Sec. School,Raj	2006	77.54%
Std 10 th	RBSE	KVM, Raj	2004	92.33%

Professional Experience:

- Company** : HCL Software (Product Based)
Location : Bangalore
Designation : Technical Architect-Devops
Period : Mar 2019 to Present
Role : DevOps Architect
1. **Company** : LTI (L&T Infotech)
Location : Bangalore
Designation : Team Lead-Devops and Bigdata
Period : Dec 2017 to Mar 2019
Role : AWS and Kafka Lead
2. **Company** : SEAGATE Technology HDD India
Location : Bangalore
Designation : Sr. Software Engineer-2
Period : sep. 2015 to May 2017
Role : Reliability engineer with Devops and Big data using Python and C++
3. **Company** : IGATE Global solutions LTD.
Location : Mumbai
Designation : Sr. Software Engineer
Period : Jul 2014 to Aug 2015
Role : Developer and Operations on NAV system using Devops and Bigdata
4. **Company** : WIPRO Technologies
Location : Bangalore
Designation : Project Engineer
Period : Feb 2012 to Jul 2014
Role : Developer and Performance monitoring using Devops and Bigdata

Current work summary and contribution:

- While managing team of 7 members , we worked on setting up a production and non-production platform from scratch based on Opensource VM and Kubernetes named as Tiger devops to provide a create a release infrastructure for HCL software products automated release and update tasks.
- Designed a architecture for Tiger DevOps solution and implemented it with team.
- Implementing solutions for launching Tiger DevOps as a PaaS solution for internal and external customers.
- Designed and implemented monitoring cluster using Prometheus and Graphana and handled SRE activities for Tiger devops platform. Leading a SRE team.
- Designed a complete CI/CD solution using Jenkins and Github Actions, Azure Devops for our product stack with HCL Accelerate and HCL launch products.
- Designed and implemented a solution architecture for container security using Anchor container security. Added security policies for containers and images.
- Automated CI/CD and deployments on Kubernetes. Impleneted Service Mesh.
- Working on data driven devops(3D model) using ELK on Kubernetes to generate some user insights to track the product usage and maximize the customer needs with reach.
- Implemented solution for performance optimization and troubleshooted problems and bugs in infrastructure
- Delivered lots of tech contents and trainings to the team on Kubernetes and Devops solutions
- Designed and implemented user matrix solutions to track the user experience and activities as per interest to get some insights and enhanced product's usability.
- Designed and implemented hackathon ideas on kuberntes based solutions for user traceability using jaeger, opentrace etc.

Currently applying devops best practices to create more secure clusters with better performance with day to day Kubernetes enhancements.

Project 2	Scania Integration management system
Description	Scania is known for high –end trucks and vehicles engaged with latest technology in all its vehicles and part of Volkswagen group. It has cloud-based RIO software based on AWS and Kafka Platform which is used in vehicles.
Technology Used	Python, AWS Cloud, Docker, ECS, SRE, Hadoop, kubernetes, Devops ,Chef, jenkins, Git, Rundeck, Teraform, Nagios and kafka ,spark and Ranger security, Kerberos, AWS KMS, Jmeter, Grafana and Prometheus, cloudwatch, sonarqube

Contribution	- Working on AWS and kafka platform and setting up production and test environment cluster for in –premise using ambari and AWS as well. Wrote terraform template s for deploying. - Created Kubernetes deployments, docker images, ELK stack, CI/CD pipelines. - Involved understanding of the system-architecture, code based and framework, sonarqube integrations, ArgoCD, and monitoring and deployment on AWS cloudwatch. - Involved in Kafka streams development on Docker containers and cloud using big data technologies and encryption using AWS KMS. - Terraform scripts to create infra, Ansible an d chef for config mgmt..
---------------------	---

Project 3	Evault cloud data backup and data recovery
Description	Evault is cloud based data backup and recovery software, cloud clustering and device data management and backup and restore the data on multiple nodes.
Role	Senior Devops engineer with Devops and Big data using Python and c++
Operating System(s)	Windows, Linux
Technology Used	Python , AWS Cloud, Docker,Chef, Terraform, jenkins, Git, Rundeck, Nagios and kafka , Nginx and C++ and ELK stack and Kubernetes
Contribution	- Worked on complete SDLC phases, CI/CD pipelines, terraform code. - Involved thorough understanding of the system specification requirement. Wrote terraform and cloudformation stack prog. - Involved understanding of the system architecture, code based and framework and monitoring and deployment on AWS using CHEF - Involved in python script creation, microservice deployment, pipelines creation, on Docker containers and AWS cloud using big data essentials as well. - Involved in the review of fixes done, sonarqube scanning, Git repo managing.

Personal Details:

Name : Neeraj Kumar Gupta
 DOB : 28th Mar 1989
 Address : #302, Krystal Amber Apartment, BTM 2nd stage Bangalore -560076

DECLARATION:

I hereby declare that the information furnished above is true to the best of my knowledge.

Place:

Date:

Neeraj Kumar Gupta
