

SUBHABRATA SARKAR

Contact No. :- 9073955262 / 7278973739
Email ID :- subhabratasarkar37@gmail.com

Current Address:-
6-Milan Mandir Road,,
Subhashpally, Siliguri
D/t - Darjeeling (West
Bengal)
Pin- 734001

EXPERIENCE

OpsTree Solutions, Noida — Sr. DevOps Specialist

Sept 2020 - Current

Responsibilities:

Clients: Zeta, Paytm and Fareportal

- As part of the Infra team, managed the AWS based environment using all major aws services.
- Used Ansible to manage infrastructure, ci/cd pipelines and wrote ansible roles.
- Managing and creating local helm charts and deployed using ArgoCD and terraform helm_provider. And also deploying charts on No-internet zone in data center.
- Manage K8s app Certs using Let's Encrypt and Cert Manager for deploying and automated renewal of certs. Also migrated existing certificates from one prod to another prod cluster and written helm files for the same.
- Setup Ceph cluster using ansible for Storage and integrating the same with On-prem Kubernetes cluster.
- Knowledge of MetalLB for Load balancer setup in On-prem.
- Redis Setup and management. Both Cluster and Sentinel mode.
- Involved in migration of Prod applications from one k8s cluster to another.

Blogs:-

- **Created a service file to rotate logs and send logs to s3 at Spot Termination.** Blog on the same:- <https://bit.ly/3SNuLqZ>
- Blog on:- **Accessing a S3 Bucket privately without IAM Creds or IAM Roles.**

- <https://bit.ly/3SHMeRP>

- Used Bitbucket/Github/Gitlab/AzureDevOpsRepos for code versioning.
- Creating the Tagging strategy to be followed at the org level.
- Redis Setup using Ansible. Standalone, with Sentinels, Cluster mode.
- Tagging AWS resources and creating Pod disruption budgets using Terraform modules and terragrunt.
- Involved in EKS Cluster upgradation from 1.15 to 1.19.
- Released the official Alerts runbook documentation and configured new alerts and modified existing alerts in Prometheus with promql.
- Monitoring K8's resources using prometheus and grafana and its setup using kube-prometheus-stack and setting alerts using Mixin-kubernetes project.
- Have knowledge about Kubernetes Operators, CRDs.
- Monitoring K8s endpoints using and Cert expiry time using Black-box exporter.
- Deploy/Configured authorization and authentication for k8's env using dex, gangway & OIDC proxy.
- Configured hashicorp vault and KMS for secret management and store.
- Configured shared library for Jenkins pipeline.
- For Logging configured ELK (Elastic / Logstash / Kibana) and created Kibana

CAREER SUMMARY:-

Skilled DevOps Engineer with 6 years of hands-on experience supporting, automating, and optimizing mission critical deployments in AWS, leveraging configuration management, CI/CD, and DevOps processes.

SKILLS:-

Operating Systems :
Redhat, Ubuntu, CentOS.

Scripting Language :
Shell Script, Basics of Python, Excel VBA (Macros)

Cloud: AWS, Digital Ocean

Docker, Kubernetes, Helm, GitLab, Bitbucket, Git, Github Actions, Azure Devops, Splunk, Prometheus, Grafana, ELK, Nagios XI, Jenkins, ArgoCd, Azure DevOps, Ansible, Terraform, Redis, Ceph, KubeSpray, Loki with Cassandra as datastore, HA Proxy and KeepAliveD

Database: Mysql

Networking : TCP/IP, HTTP, DNS, DHCP

dashboards and managed their entire infra on Digital Ocean.

- Integrated two docker images into one by writing dockerfile from scratch. Worked on docker-compose.
Opensource project - <https://github.com/covidboy/goofys-allure-docker-service>
Docker-image- **ssubhabrata/goofys-allure-docker-service:v1**
- Written a bash script that scrapes endpoints every 5 minutes and sends report logs to Elasticsearch.
- Configured firewall rules using iptables.
- Written a bash script that scrapes endpoints every 5 minutes and sends report logs to Elasticsearch.
- Setup Mysql master-slave replication and Sonarqube setup for code analysis and integrating with Jenkins.
- Used Jira ticketing tool and confluence.

AWS:- VPC, EC2, S3, ELB, AutoScalingGroups(ASG), EBS, IAM, Route 53, CloudWatch, CloudFront, CloudTrail, EKS, Direct Connect, Kinesis, S2S VPN, Transit Gateways.

Ericsson Global India Pvt Ltd, Noida — Assistant DevOps Engineer

Oct 2016 - Sept 2020

- Worked as a 2nd LA RAN Engineer for FLOW Jamaica. Troubleshooting RAN nodes and their health check, call flow etc
- Hands-on experience on Ericsson CDN providing Live and VOD content for Telstra Australia.
- Bash script to check in logs if a token expired or not for http 403 responses. Bash script to automate the Healthcheck of 150 nodes.
- Containerising various VM based applications by Docker and onboarding them to Kubernetes Cluster.
- Creating On-prem Kubernetes Clusters using Kubespray. And adding/removing nodes to the cluster by creating Azure Devops pipeline.
- Worked on OWASP Vulnerabilities. XSS, DDOS, making nginx more secure.
- Creating Certs via DNS challenge using Certbot and Letsencrypt and patching them into the cluster for the private endpoints.
- Excel VBA Macro code to generate daily Roster data in the required upload template.
- Worked extensively on [Splunk](#), creating dashboards, alerts, reports, field extractions using the Splunk IFX and Regex.
- Have set up the entire Splunk Infra in Model environment.
- [Received the quarterly Ericsson Power Award for outstanding performance and above automations.](#)
- Performing package administration using RPM & YUM in Red Hat Enterprise Linux.
- Monitoring system resources, logs, disk usage, scheduling and monitoring backups and restore.
- Setting up cron jobs for the user to deploy scripts on production servers.
- Installation and configuration of NFS, FTP, APACHE on RedHat.
- Managing Logical Volume Management (LVM) Storage.
- Server health monitoring and Good hands-on knowledge of [Nagios XI](#) configuration through CCM for active/passive checks and creating your own Nagios check commands using existing Nagios check plugins, creating dashlets, dashboards using the Graph explorer.
- Understanding of Audio/Video Codecs (H264,Mpeg-4) and Containers (.flv, .mp4).

Virtualization:

VMWare Esxi 6.5

QoS monitoring tool:

Touchstream, Conviva

Misc:

HP Proliant DP series (and iLO), RAID Configuration, F5 Load balancer, Extreme X670 Switches

LANGUAGE:

English, Hindi, Bengali

EDUCATION:

RCC Institute of Information Technology,

Kolkata — *Electronics and Telecommunication*

Aug 2012- May 2016

Percentage - 72%

JVM Shyamali, Ranchi

July 2009 - May 2011
