EDUCATION

2010: Bachelor of Technology in Mechanical engineering from National Institute of Technology (NIT), Warangal

CORE COMPETENCIES

- Maintenance Planning & Implementation / Predictive/ Preventive / Breakdown Maintenance
- Strategic Planning / Quality Control / Continuous Process Improvements
- Project Engineering & Management
- Mechanical Maintenance / Reliability Maintenance / Hydraulics
- Team Building, Mentoring & Leadership / Capability Building
- Client / Vendor / Stakeholder Management/ Contract Management
- Procurement & Sourcing / Material Management
- Budgeting (OPEX & CAPEX) & Cost Optimization / Annual Planning
- Audits & Compliances / KPIs Monitoring
- CMMS - SAP (MM & PM) Implementation
- Resource & Manpower Management / Repairing, Testing & Inspections
- Reporting & Documentation / Liaising & Coordination (Govt.)

PROFILE SUMMARY

- Experienced in managing erection & commissioning activities & maintenance of a wide range of machinery & equipment; executed predictive, preventive & breakdown maintenance schedules which improved reliability of equipment across Aluminum Extrusion, Steel Plant - Rolling Mill & Food Processing plants
- Expertise in enhancing the reliability, life cycle managment & ensuring maximum equipment availability, balancing maintenance & production line and conducting the RCA of breakdowns & taking corrective preventive measures
- Experienced in implementation ERP systems - Maximo(PM & MM module), SAP(PM& MM module), Oracle(Prodcution management module). Implemented quantEffect (OEE monitoring tool), quantPredict(Condition monitoring tool).
- Led Project Teams to provide complete project management services for execution of assigned projects from inception to completion & handover
- Project Engineering: managing technical integrity of all project deliverables (including Drawings, Datasheets, Technical specifications, Material Requisitions, Technical bid evaluations) in accordance with industry standards & norms
- Managed diverse range of Projects with activities like equipment selection, equipment erection & commissioning capacity planning, contract administration, procurement resource planning, vendor management, costing and quality assurance
- Negotiated with contractors and suppliers for materials and services; ensured that each stage of project progresses on-time and within budget; estimated quantities, analyzed rates for each activity and figured valuation of work performed

WORK EXPERIENCE

Jul'18 – Till Date: Quant Service (Gulf Extrusion/Switch Foods), Dubai, UAE

Reliability Engineer/Process Engineer

Role/Process Engineer(Mar 2023-Till date):

- Leading operations and maintenance of Food processing plant. Led site mobilization and setup, CMMS setup, OEE tool setup and process setups. Conducted process optimization for various lines and improved line speed incoordinations with OEMs.
- Implemented quantpredict for class A equipment as part of life cycle management.
- Lead production management ERP system setup incoordination with all interested parties.
-

Role/Reliability Engineer(July2018-Mar 2023):

- Taking ownership for maintenance of Extrusion Press (8", 10"), Powder Coating, Anodizing, Fabrication-CNC & Cutting Machines, Material Handling Equipment, Conveyor System, Compressors and Utilities-Boiler, waste treatment plant, water, Gas & compressed air distribution system
- Administering functions including Maintenance Budgeting (OPEX & CAPEX), Analysis of Deviations, Annual PM Plan Development, Equipment Scheduling & Optimization, Spare Parts Maintenance & Optimization and Continuous Improvements (quality/ cost/ safety)
- Maintaining key performance indicators (KPIs) - Availability, MTTR, MTBF & Breakdown Percentages for process lines; improved reliability of process lines by using Pareto Analysis, IVR & RCA Process such as why-why diagram and fish bone analysis
- Planning scheduled maintenance, responding to breakdowns, diagnosing faults, repairing equipment, supervising engineering & technical staff, obtaining specialist components, fixtures or fittings and managing budgets & records
- Managing functions including Risk Assessment Documentation, LOTO Procedures & Work Permit System Implementation
- Dealing with Sub-contracting Teams to execute client projects in coordination with Procurement & Finance Teams
- Steering audit documentation & compliance - ISO9001, ISO45001 & ISO55001

SOFT SKILLS

[redacted]

PERSONAL DETAILS

[redacted]

Nationality: Indian

Visa Status: Employment Visa

[redacted]

Driving License: Valid, UAE Driven

- Anchoring & coordinating on-site activities to ensure smooth work progress and conceptualizing & implementing measures for enhancing operational efficacy and optimizing resource utilization
- Experienced in condition monitoring - Vibration analysis, Oil analysis & Ultrasonic devices utilization.

Highlights:

- Led successful implementation & execution of Colouring Project in anodizing lines with Operation Team
- Successfully executed Pilot Projects including mobilizing & installation of fabrication equipment, sand blasting line set up, polishing line set up, crimping machine installation

- Implemented - destructive roller project and mist project for optimizing quench system to improve productivity of extrusion press
- Implemented Natural Gas Sustainability Project and successfully availed Coc renewals and ADNOC Noc approvals

Aug'15 – Jul'18: Srinivasa Farms Private Limited, Hyderabad, India

Manager

Role:

- Worked closely & coordinated with concerned government departments to get Consent for Establishment & Operations
- Steered layout preparation & coordination with Structural & Technical Consultants
- Developed detailed project plan and progress tracking techniques
- Worked on AutoCAD to draw & edit digital 2D and 3D designs effectively
- Designed the capacity of equipment as per process requirement, vendor selection & procurement; executed quality inspection & assurance, performed for all equipment
- Conducted project feasibility studies & review meetings for evaluating project progress & de-bottlenecking and developed, reviewed the business case and the definition of requirements while clarifying the quality of the project
- Managing vendors for work and manpower outsourcings to reduce the project cost and meet the delivery timelines
- Coordinated complete functions of end-to-end project management including project team resource identification, stakeholder interface, project planning, requirements gathering, technical & functional documentation and issue tracking & resolution
- Identified & evaluating the project risks / lesson learnt registers, prepared mitigation plans and ensured their successful implementation
- Developed & maintained detailed project schedules and monitored costs to ensure project schedules are on track & meet all deadlines

Highlights:

- Led a team of 100+ people and executed Food Processing Plant Project worth 30 million
- Monitored overall operations of plant & prepared detailed cost forecast; prepared detailed documentation for cold chain subsidy & successfully achieved 5 million savings
- Awarded with "Passion for Excellence - for going the extra mile" Award in SH group

Nov'12 – Apr'15: Jindal Stainless Limited (Steel Rolling Mill), Orissa, India

Associate Manager (Mechanical Maintenance – Hydraulics)

Role:

- Contributed effectively in preventive maintenance & breakdown maintenance of Finishing Mill, Roughing Mill, Down Coiler and over all Plant Hydraulic Systems
- Developed new hydraulic circuits during equipment modifications
- Developed SOPs for critical equipment maintenance activities
- Worked closely with Quality & Productivity Improvement Project Team
- Implemented many logics modification for equipment safety and reliability
- Working experience in SAP and IBA analyzer

Highlights:

- Implemented RGL system for finish mill rolls to improve it's tonnage
- Represented Jindal stainless limited in IOCL steel meet -2014 -"Presented on plant Performance Improvement Project - Implementation Roll Gap Lubrication Systems"

May'10 – Oct'12: Welspun Corp. Ltd. (Steel Rolling Mill), Gujarat, India

Engineer (Mechanical Maintenance)

Role:

- Executed preventive maintenance & breakdown maintenance of Descaling System and Hydraulic System of Plate Mill
- Detailed knowledge of all hydraulic & pneumatic circuits and various types of valves
