I have more than 8 + Years of experience in Technical Support Field , I have excellent skill on Dot net based application and MY SQL Database. However I have also worked on Postman (API) ,XML and Windows based applications and Deployment task. Also familiar with JIRA and other tickets tools.

EMPLOYMENT HISTORY

Feb 2021 - Present

Sr. Technical Support Engineer -> Busybees Logistics Solution Pvt Ltd, Pune ,Maharashtra
Being a Senior technical support I was handling the escalated issues from L1-Support and clients. I had been part of the meeting with business heads and senior manager and responsible to take them through business blockers and hot issues with application and steps to resolved with agreed SLA's and TAT. Pulling down the reports of open ticket and summarize the issue with category and allow support team to work on them and discussing the solution across the team. Also I had been working on API testing and manual testing to complete the integration across the platform. I worked on Postman ,XML ,MY SQL and Dot net application. Used JIRA Software to raise bug to DEV team and Engineer Manager. Supporting windows troubleshooting and logs verification.

Aug 2019 - Sep 2020

Software Engineer -Off Shore Support -> E-emphasys Pvt Ltd., Pune , Maharashtra
Being a L2 Support engineer ,I used to support the US ,UK and Ireland Customer with the help of Chat ,email and ticketing system. I have worked there on Dot net based application and My SQL DB, Also been working on deployment task of product upgrade and release functionality. I also worked on IIS Manager ,Tomcat apache server to restart the services and analyzing the logs for application hosted on customer places. being there in the call with customer to resolved and understand the more about the issues they are facing. applying the back end fixed on issues whenever required and resolving the technical request from L1 - Support team. MS CRM Support and Power BI Support to the applications.

Jun 2015 - Jul 2019

Technical Support Engineer -> Xpressbees Pvt Ltd - (FirstCry), Pune , Maharashtra
Being a Technical Support Engineer I have worked on Ticket tool system where would get the customer request and then had to resolved them in TAT and with SOP's. Acting as L1 - Support Engineer to receive the calls /chat and replying to the customer emails. Windows troubleshooting and fixing the issues with the help of L-2 Support Team. Following up with Development team for unresolved issues and keep the customer up to date with latest updates.
