SKILLS

Android | Java | Kotlin | Machine Learning | Dependency Injection | SOLID principles

PERSONAL PROJECTS

VANI Video Player

- A Local Video Player to play video files. Used Exoplayer, PIP mode and other related features. Link to project :https://github.com/mnshlohia/Vani

IMAGE VIEWER

- This is a Image Loading and viewer app using Reddit Api to load images and view them. It uses memory cache and disk cache to load images if images are already loaded earlier. Used LruCache for Memory caching and Jake Whalton's Disk Cache for Disk Cache in the Image Loader module. Components. Link: https://github.com/mnshlohia/ImageViewer
